

Aracne Table

Product Categories: [Outdoor](#), [Tables](#)

Product Page: <https://propertyfurniture.com/product/aracne-table/>

Product Description

The distinctive feature of the tables in the Aracne range is their supporting structure, whose design recalls the shape of a spider. The components of this structure are die-cast in aluminum and extruded aluminum (35% recycled), glued together and painted three different colors. The base components of the table are easily assembled using only four screws. The special modular structure means it is possible to create a great variety of shapes and sizes. In all the variants of the Aracne tables, the top is available in: MDF painted, ultra-clear glass or smoked glass. The product's flexibility also lies in the possibility of matching the base and the top in the customer's desired color combinations. The Aracne table, fully made in aluminum, is also suitable for outdoor use (combined with the glass top).

Product Attributes

Dimensions: Rectangular:

75"L x 39.5"D x 29"H

96"L x 39.5"D x 29"H
