Product Description

There are two types of wall covering. One reproduces the motifs of the floor tiles on a smaller scale, with an alternation of matt and shiny glazes. With regard to color, dusty shades of clay, mud, cipria powder, and sand are coordinated with shiny tones of teal, salmon, whale grey and cerulean, which have the precious look of metals. In the other version, the bas-relief graphics that stand out on a base of natural Cotto in a pinkish shade, are exalted by crystalline, pale glazes in the shades of baby pink, pearl grey, cherry red, and green apple. The collection includes: matte flooring or glossy wall covering. Designed in 2017. Handcrafted in Italy.
