### Product Description

The idea behind the Conic series was to create a new generation of garden furniture that brings new features and a different style to the market. The new connection system supports the great flexibility and allows for an easy redesign of the terrace or garden. Various elements can be used separately or together to form a large configuration. The color concept of the Conic series combined with the transparent look assures it to fit into many places. The collection includes an armchair, sofa or sunbed.
