### Product Description

The Core dining table combines the classic with the modern and lifts the use of teak

in outdoor furniture to new levels. The soft curves of the table top are paired with a frame of conical pipes in powder coated aluminum. The result is a table that in spite of its light appearance is very strong and hardwearing. The teak slats are hand-selected and of the highest quality, supplied by WWF/GFTN certified members in Indonesia. The Core tables come in three different sizes. The collection includes a dining table, armchair, and various dining chairs.
