Product Description

The luxurious extendable Edge dining table in stainless steel and outdoor HPL table top is a perfect way to "extend" your outdoor life in the garden. The dining table can extend up to 130" and will seat 10 people. It is very easy to extend the table if you need more room. Both extensions are stored inside the table and are easy to operate. HPL or High pressure laminate is a very suitable material for outdoor use. The table top is made from resin-impregnated paper, which is compressed under very high pressure to a strong board with a scratch resistant surface. These tabletops require basically no maintenance and can remain outdoors all year round. Protective covers are available. The collection includes a dining chair, bench, dining table or armchair.
