### Product Description

Pendant light, inspired by the transformation of water into ice. This moment is

similar to work in a glassmaker shop. Creating a solid object from a liquid material is an essential characteristic of glass. Each piece traces a unique record of the process, becoming an original. Maxim found inspiration among pieces of ice created by nature and applied that element of randomness in nature to his craft in the context of glassmaking. The result is a 'frozen' sculpture, combining the richness of glass textures, wrinkled details, bubbles, and varied thicknesses. The pendant light is made in two sizes. Cluster of 3 or 5 pendants available. The collection includes bowls, ice bucket, and pendant lights.

Light Bulb: E 14 max 40W. \*UL Listed. Hand made in the Czech Republic.
