Product Variants

- #64870 - Kepler Pendant Light - 29"W - \$ 825.00

- #64871 - Kepler Pendant Light - 41"W - \$ 995.00

Product Description

Named after the German mathematician, astronomer, and astrologer who discovered the Supernova, Johannes Kepler, this luminaire is reminiscent of black holes and portals from science-fiction. COHDA have used highly innovative

materials for this design, multiplying single LEDs over a large thin surface to widely refract the light and give the illusion of infinity. The fine material, which has been likened to hosiery from the fashion industry, creates a fascinating effect, like a kaleidoscope of light rays. With Kepler, there is an opportunity to create huge and impressive light installations using very compact and lightweight units.

Light Bulb: integrated LED source 2700K Triac/ Lutron dimmable

Product Attributes

Dimensions: 29"W x 28"H

41"W x 40"H

Canopy: 6"Diam. x 2.5"H **Color:** Shade/Structure: Polycarbonate with Mirco-weave fabric/ black steel
