Product Description

The Light Tray lamp is the ultimate expression of functionality and design. Created by Daniel Rybakken and Andreas Engesvik, the pair set out to re-examine the design of the traditional table lamp. A tray with hand-blown glass cups acts as an artificial surface, both concealing the unit's electronics and creating the illusion that the lamp has no external power source.

Material: white lacquered metal tray with 3 lamp sockets E14 with 4 different hand blown glass domes in fixed colors and sizes.

*Quantity Available: 1
