Product Description

The design for the Otto glassware collection was approached with a balance of refined detailing as it applies to both the rustic qualities and the precise craftsmanship of each piece. Alternating radial and tangential cut lines provide dramatic texture to careful line work and well-defined silhouettes of the Otto collection. "This collection projects an approachability and relaxed elegance through simple, refined details and an overall language that feels familiar and comfortable yet distinctive, " describes designer, George Yabu. The stemmed drinkware features solid, weighty bases, precisely etched texture and clear Bohemian crystal. The Otto collection features glassware, decanters, carafes, and an ice bucket. Hand made in the Czech Republic.
