

Sharky Stool

Product Categories: [Bar Height](#), [Counter Height](#), [Stools](#)

Product Page: <https://propertyfurniture.com/product/sharky-stool/>

Product Description

The Sharky Stool is available in two heights with seats in different shapes with wood legs. The stools with narrow lines and an overall effect that is extremely resistant.

The high stool entirely replicates the seat of the chair and becomes a comfortable bar stool, whereas the low stool has been shortened for a more harmonious overall effect.

The two fin-shaped coupling elements clearly remain on the rear part, as a linking element between the frame and the base; a technical detail that is the key characteristic of the project.

These two versatile seats are ideal for use in the home or as a distinguishing

feature of a project at a restaurant, bar or hotel. The Sharky stool can be fitted with light padding and upholstered in high-quality Kvadrat® fabric in different colors that create many combinations. Outdoor option available. Removable seat cushion available.
