

## Sushi Dekton Table

**Product Categories:** [Tables](#)

**Product Page:** <https://propertyfurniture.com/product/sushi-dekton-table/>

### Product Description

The Sushi table is an elegant and stylish piece of furniture and one of a collection. This particular item is very popular and has been for many years, loved for its timeless style, resilience, and innovative design. The table is beautiful and very versatile, perfect to use as a dining room table, a desk in an office, or table for a conference room. The table is available in extendable and fixed versions and both designs look amazing when placed in a room with minimalist style. The extendable version, when pulled out to its full extent, still manages to retain its aesthetic style, with the legs remaining at the ends of the table and thin, sleek top remaining even and parallel to the floor. The table is strong and sturdy and simple, although unforgettable in design. Collection of tables available in five different finishes for the top. DEKTON® by Cosentino is a mix of the latest building materials, used to

create a top that is ultra- resistant to abrasion, UV rays, temperature variations and stains. All this can be found in a thickness of just 8 mm, which combines minimalist aesthetic appeal with extreme uses. Dekton material offered in three color options. Outdoor version available.
