### Product Description

X-Ray is a lounge chair meant for outdoor and indoor. The main feature is the use of expanded metal: its transparency suggested the name of the product. The frame is made of a curved 20mm steel tube, the seat and the back are based on a laser-cut and curved expanded metal steel sheet. The chair feet are provided with 36mm diameter disks for better stability on soft ground. The cathoretic coating provides anti-corrosive protection to the powder coating finish, making the chair reliable for any outdoor environment. Designed in 2018. Made in Italy.
